For more information about the National Science Foundation's role in science and engineering research and education, visit the NSF website at www.nsf.gov. The National Science Foundation is an independent federal agency created by Congress. It funds basic research and education in all the physical sciences and engineering except medicine, and it creates opportunities for mathematical and computational sciences, environmental sciences, social sciences, and geosciences. The National Science Foundation shares this responsibility with the U.S. Department of Energy, which oversees mathematics, computer science, and atmospheric and space sciences; and the National Aeronautics and Space Administration, which oversees space sciences.
